

Individual and Family Plans

Standard Premium Rates for Montana

Rates effective January 1, 2012.

Premium for a PacificSource Individual and Family policy is based on the plan design, deductible chosen, and each applicant's age. If more than one individual is applying for coverage, add each individual rate together to calculate the total monthly premium. Depending on health status, an individual may be offered coverage at a rate that is higher than the standard rates shown on this sheet.

Preferred
